

## SPECIFICATION

Catalog No: 3243000

- Haemocytometer Set
- Neubauer-improved Counting Chamber

**HBG Haemocytometer is used for visual counting of the number of cells in Blood sample or other fluid under a microscope.**

- HBG Double improved Neubauer counting chamber designed for accurate counting of blood cells, platelets, dust/yeast clusters, and specimens in spinal and other fluids.
- Thin coating of rhodium on plateaus provides sharp contrast for the bright lines and cell, reducing user eyestrain and fatigue.
- Special polished glass chamber and cover glass assure precise capillary loading and even cell distribution.

### Complete set consist of:
